# Level up your reporting game

Fluence offers a full spectrum of financial and finance-led reporting solutions - so you can finally tell the full story behind the numbers.

## The value for finance & accounting

### CAOs & Controllers

Eliminate reliance on IT or coding to create new reports or make minor changes.

### CFOs & Finance VPs

Never miss an opportunity for growth with trusted, timely reports on what matters most.

### Directors & Managers

Minimize errors, risk and liability due to manual efforts and lack of controls.

## Self-serve reporting designed for Finance

 **Connected Excel**  
for interactive reports that are secure and auditable.

 **Financial templates & models**  
to easily create professional standard (IBCS compliant) reports.

 **Finance-focused data**  
for real-time reporting tailored to any business audience

 **Automated report distribution**  
to provide instant insights for stakeholders.

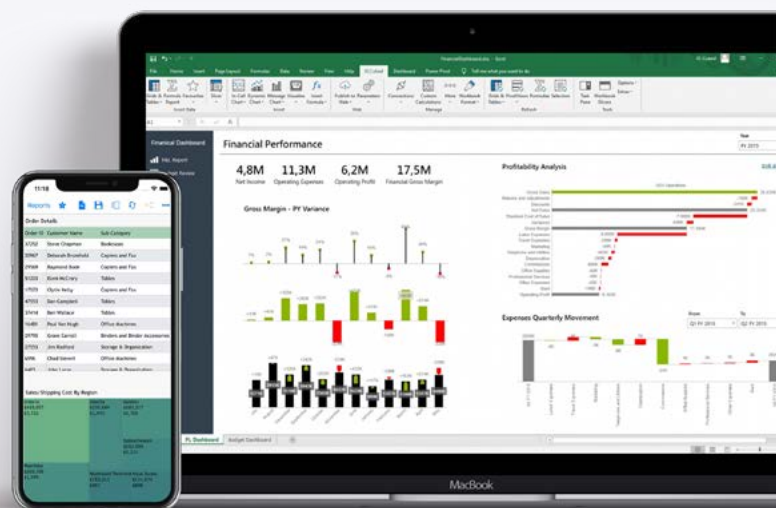

“Today’s leadership teams want immediate answers to what-if questions. Fluence makes that possible.”

**Robert Kugel**  
SVP & Research Director  
Ventana Research

## Led by finance, trusted by everyone

- ✓ Turn financial data into insights and distribute reports the instant the books close for smarter, more agile decision-making.
- ✓ Work in the familiarity of Excel and enjoy rapid adoption rates, with no IT or coding required.
- ✓ Produce real-time financial, management and operational reports on any metric or KPI - on any device.
- ✓ Automate any financial consolidation, close or reporting process and focus on strategy and analysis.
- ✓ Feel secure with built-in controls and governance that everyone can trust.
